PART 01

Gud Industry

Gud Mould Industry Co., Ltd. is a professional manufacturer of plastic injection moulds and die-casting moulds. Founded in 2007, Gud Mould Industry Co., Ltd. covers an area of 7000 square meters and has more than 100 experienced staffs, of which more than 30 with years of experience in this field. Gud Mould has a large number of advanced precision die and mould processing equipment such as EDM, WEDM, milling machines, tool grinders; detection equipment and instruments such as imported spectrometers, metallographic analyzers, water capacity detectors, coordinate detectors, gauges. International advanced AutoCAD, Pro/E, UG, Cimatron, MASTERCAM are applied in die design and production. All manufacturing processes realize digitalization to ensure stability of high precision and quality of dies. Materials are made of high quality steel and precision standard die base, which ensures service performance and life. In line with principle of customer first, we provide best quality, delivery, service and reasonable price, absolutely guarantee interests of customers, and provide confidentiality commitment to all technical information of customers.

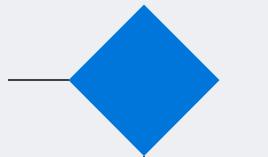

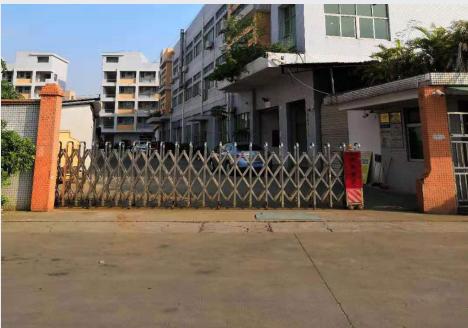

About us

Manufacture Site

MANUFACTURE SITE

Domestic market first, preparing for foreign market.

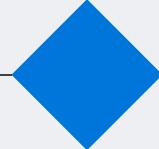

SAMPLE ROOM

All designed sample which have a lovely story can be found here.

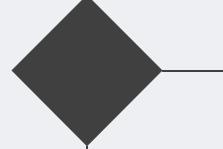

MOULD WORKSHOP

There had our lovely staffs, they reagrd all designed products as their friend.

INJECTION WORKSHOP

We provide one-stop service from mold design,mould production to assembly/injection.

DIE CASTING WORKSHOP

Die Casting finished in independent workshop to guarantee our quality.

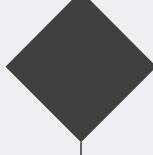

POST PROCESS OF DIE CASTING

After die casting, we provide post-process to serve a full complete product for customers.

R&D CENTER

Has customized idea, share us. We will finish it for you.

QA&QC DP

Quality from production rather than inspection, we are staff's guides.

MOULD WORKSHOP (MA BRANCH)

INJECTION DEPT(MA BRANCH)

PART 02

GUD CULTURE

Gud Culture

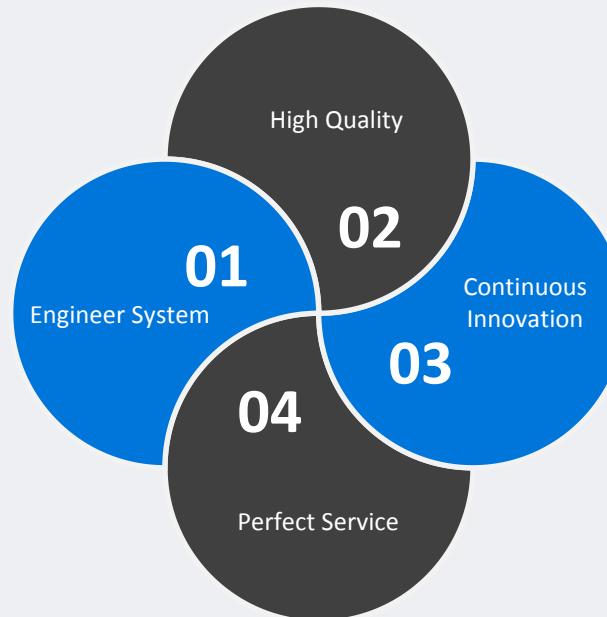

Engineer system

Once each project started, project responsible manager will be appointed as head of this project.

Continuous Innovation

A group of core R & D molding designers is Gud Mould's strong competitiveness in the market.

High Quality

At Gud Mould, quality control exist in every link of each project starts from design of your mold.

Perfect Service

Your solution provider from engineering, mold making to injection, assembly.

01

ENGINEER SYSTEM

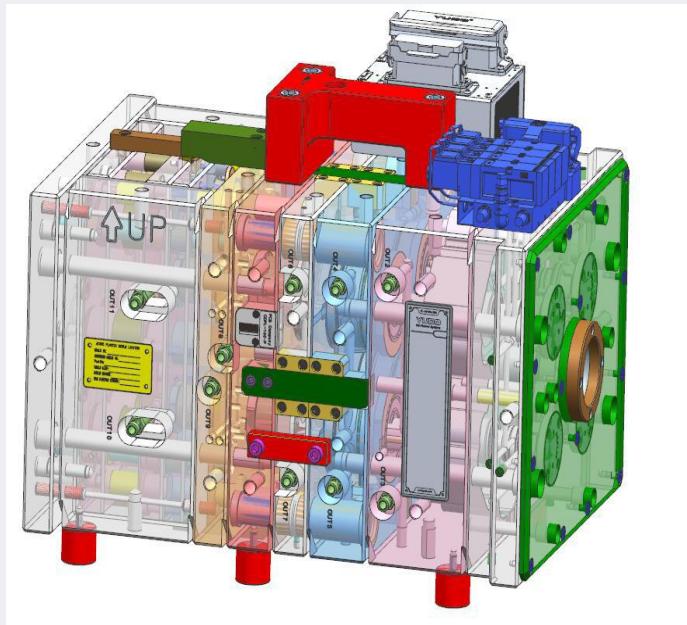

Gud Mould has a group of competitive molding designers who can design 3D, 2D and other molding design efficiently and accurately. Simultaneously CAD / CAM / CAE, ProEngineer and Solidworks UG design software are introduced to improve design quality and progress. To minimize design errors, actual machining conditions is be taken into account to perform a model flow analysis for product structure. MOLDFLOW software is used to simulate resin flow in the cavity, provide the best solution and greatly shorten mold development cycle.

HIGH QUALITY

Gud Mould have a strict quality management system, and equipped with a number of high-precision testing equipment imported from abroad. From production to delivery, quality control permeates every link. At the same time, we also have strict certification procedures for suppliers to ensure quality of raw materials and turnover materials.

03

CONTINUOUS INNOVATION

Professional software analysis and engineering evaluation are carried out for different structure and mould production in Gud Mould, reasonable structural requirements are synthesized, die structure is simplified, and technical review with customers is strengthened. Different inspection and review standards (photoelectric, medical, automotive products, etc.) are formulated according to different product areas to thoroughly understand design requirements. We conduct periodic evaluations to find the best way to reduce design cost of products or applications..

PERFECT SERVICE

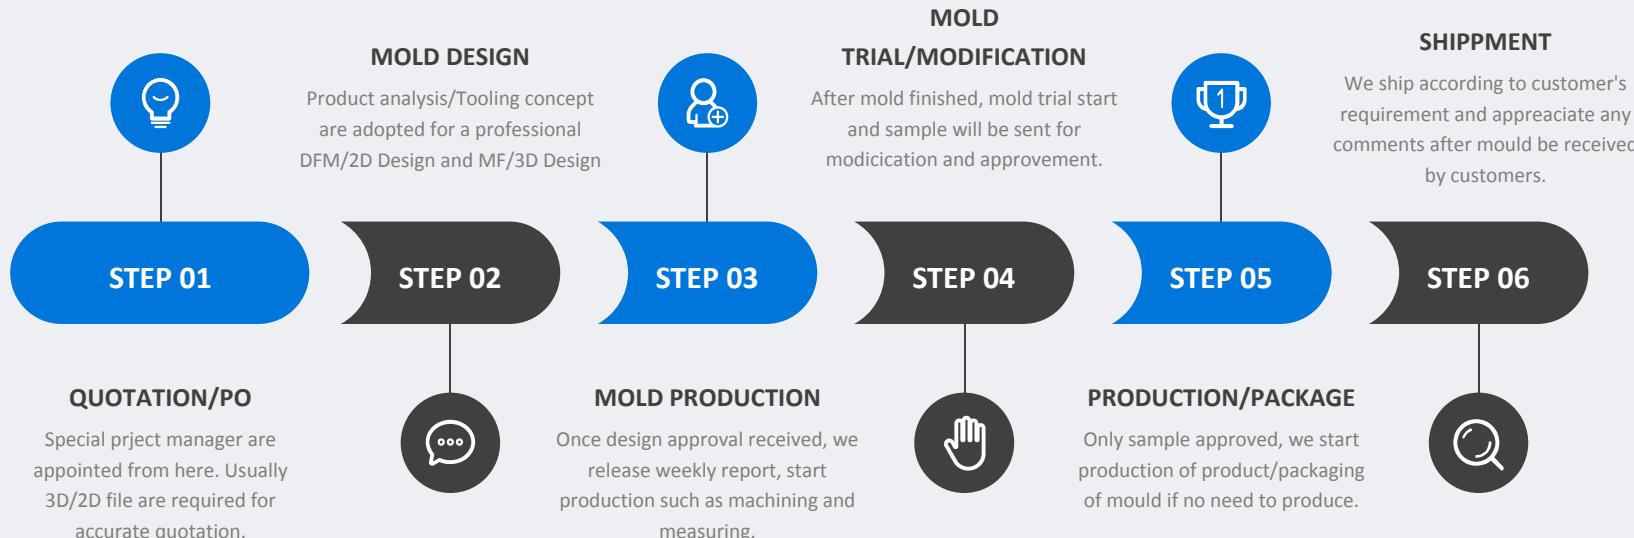

With vertical, horizontal and dual-color moulding imported all-electric equipment, Gud Mould have rich manufacturing experience for high-light, special engineering materials, transparent, electroplating products, forming technology is in the forefront of injection industry. Continuous application of automation devices greatly enhance efficiency and ensure product stability. Use of all-electric injection moulding equipment and automated production process, Different types of monochrome and multi-color forming machine equipment from 50 to 250 tons, continuous improvement, excellence, full participation in improving quality, efficiency and cost, constantly improve customer satisfaction, and strive to become industry leader!

Project Management

PART 03

GUD FACILITY

CNC: 5 sets

EDM: (TopEDM)4 sets+(DMT)1 set

Miller machine(QUSUDA): 4 sets

Ginder machine(Tongzhun): 4 sets.

Projector(Shinrein): 1 set
CMM(RENISHAW): 1 set

Injection machine(JSW): 6 sets

Procurement Schedule

- 1, 2 sets of SODICK high procession mirror EDM machine;
- 2, 1 set of MAKINO high speed CNC machine
- 3, 1 set of FANUC high speed CNC for making electrode
- 4, TBD

Equipment List(Gud Mould Industry Limited)

PART 04

GUD MOULD

PLASTIC MOULD

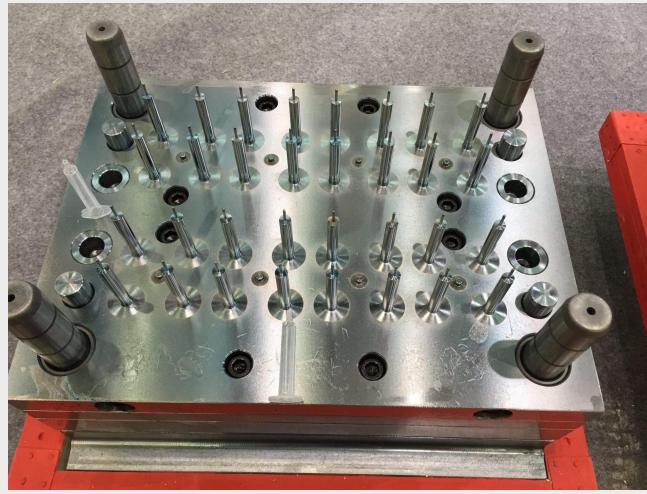

Plastic Mould, as core of Gud Mould, exists since its establishment. It is equipped with more than two-thirds of Gud Mould's technical personnel and equipment. Customers range from automotive, home appliance, consumer electronic, OA equipment to motorcycles, medical consumables and so on.

Gud Mould

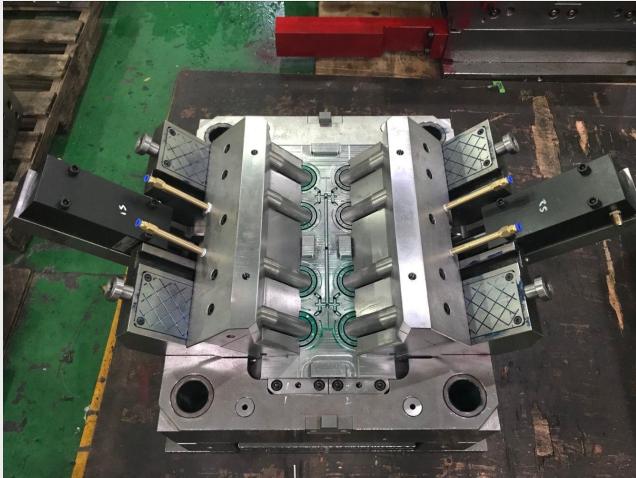

Automobile series: automotive interior parts, bumpers, instrument panels, door panels, and other accessories.

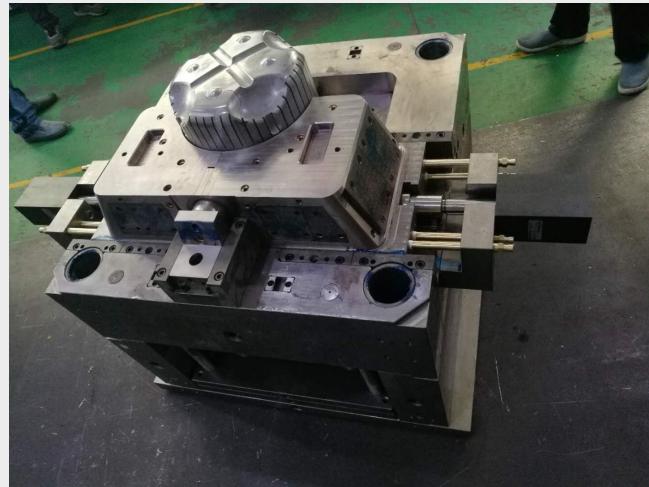

Medical series: sphygmomanometer, portable medicine box, plastic housing for medical equipment, etc.

Gud Mould

Industrial series: vending machine, POS machine, bank ATM machine, communication equipment i
ndustrial water meter, electrical switch, industria
l control box, and industrial control signal device.

Home appliance series: TV front cover, TV back c
over, monitor cover, air conditioner or refrigerato
r plastic parts, washing machine parts, etc.

Household series

Plastic chairs, plastic tables, baby tubs, plastic basins, flower pots, plastic containers, shopping baskets, laundry baskets, plastic boxes, etc.

Office series

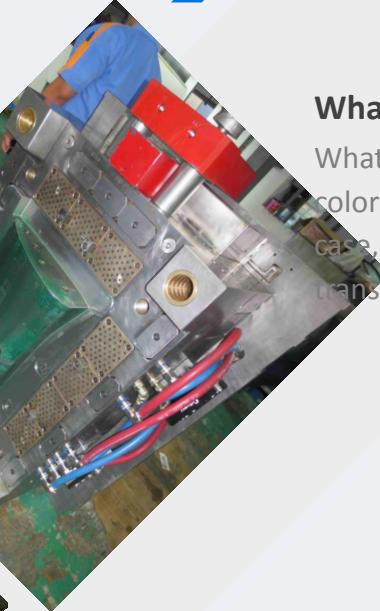

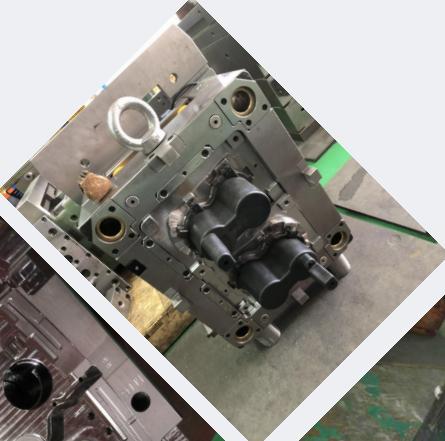

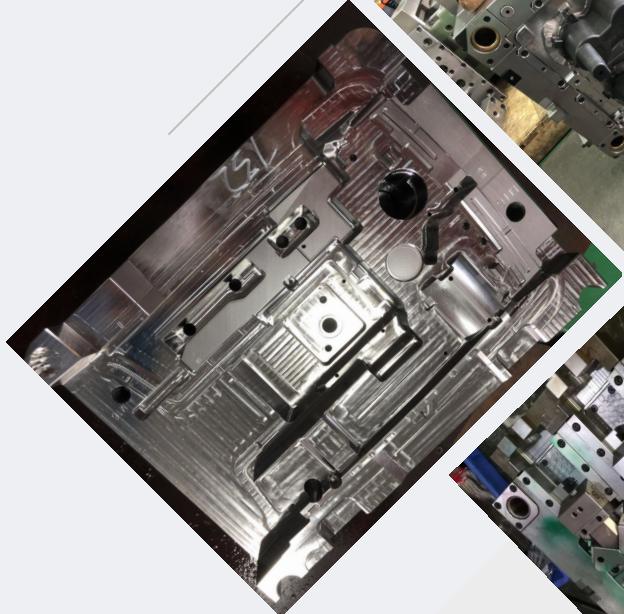

Fax, printers, copiers, projectors, shredders, scanners, desktop computers, notebooks, time attendants, binding machines, etc.

Electronic series

Phone case, Bluetooth earphone case, Bluetooth speaker case, humidifier case, etc.

What's more

What's more...

What we provide more are two-color button, two-color phone case, two-color plastic case, LED transparent mould and so on...

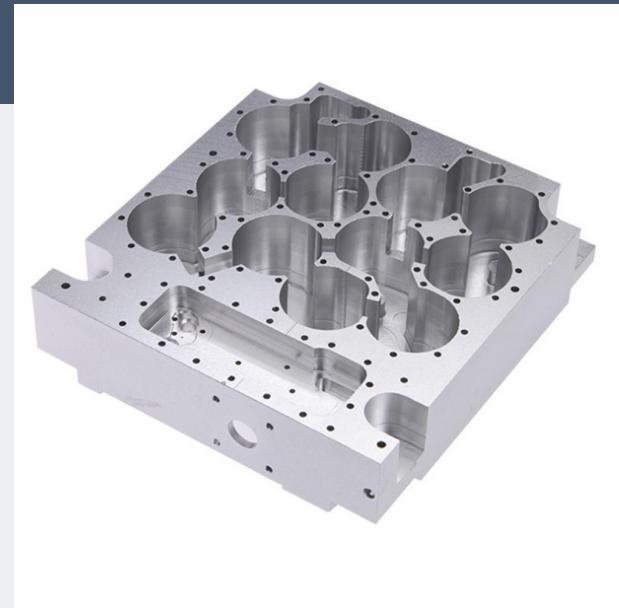

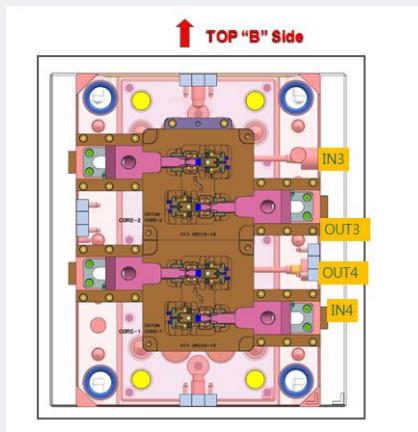

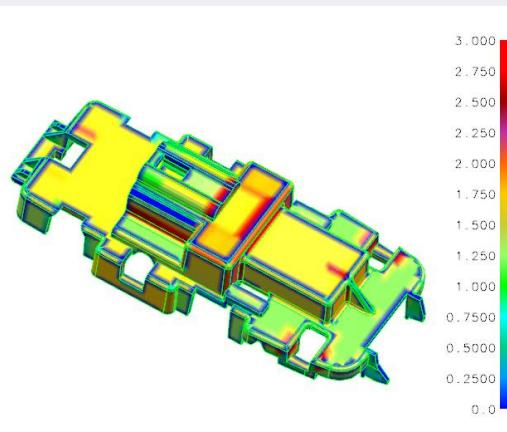

Plastic Injection Mould
Automotive/Medical/Industrial/Electrics/Household/Daily Necessaries/Toy Series

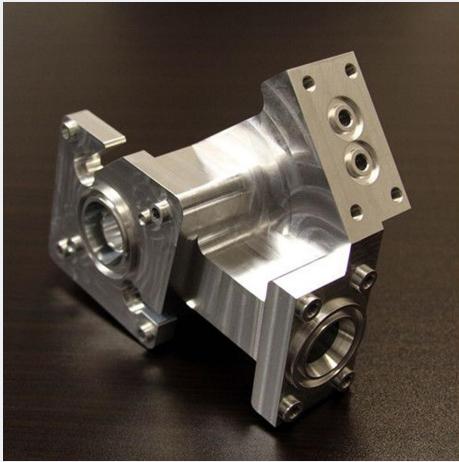

Die-Casting Mould
Aluminium Alloy/Zinc Alloy Series

DIE-CASTING MOULD

Metal department, start in the end of 2010 and including mould of zinc alloy and aluminum alloy. Its customers cover more than 20 cities from China such as Shenzhen, Guangzhou, Shanghai and Hangzhou.

Aluminum alloy mould

Aluminum alloy mould is widely used in household appliance, automotive, electronic appliance, office equipment, machinery and other accessories because of its light weight, strong wear resistance, high mechanical strength, good heat transfer, electrical conductivity, and high temperature resistance.

Zinc Alloy Mould

Surface of zinc alloy die casting is a dense layer with a thickness of about 0.1 mm and a loose porous structure inside. When designing zinc alloy mould and using die-casting process, try to make surface of workpiece smooth to reduce casting defects such as cracks, pores, cold gaps, flash and burrs. For this reason, mechanical cleaning must be carried out.

PART 05

GUD CUSTOMER

2019 Look Ahead

NORTH AMERICAN

We employ new foreign sales director/techcian that is familiar with Europe/USA mold standard..

CHINA

Our roots here, we will assert it.
